

Induction Program

Induction program is generally organized by the college for the newly admitted students of semester –I, at UG level, in the beginning of the academic session. The general objective of the program is to make them aware about the various facilities, activities, infrastructure, rules regulation, various departments, etc. But this year was COVID-19 lead lockdown, so most of work is done at Home under work from home drive by the govt. So it was not possible for us to organize this program in this academic year. But next year this program will be organized.
