**REPORT ON HEALTH AND HYGIENE**

As per, Government's Rules and Regulations, we maintain Health and Hygiene practices in our college. During the worldwide COVID-19 Pandemic, after the lockdown opened. When student started to come to college.

The institution instructed them to take care about their health and hygiene. They were instructed to follow the rules and regulations of Government of India like :-

- 1) Maintaining the distance of three feet or one metre between two students.
- 2) Regular hand washing by which, they can escape from the danger of Corona virus infection, and that is the most important thing from their health point of view.
- 3) Students were strictly instructed to not to shake hands, because this is also an easy way of spreading Corona Virus.
- 4) Students were instructed to wear face masks, otherwise they were not allowed to enter to college.
- 5) Record has been maintained by register the name of students and visitors on note book, who came to college.
- 6) One employee was appointed at the gate of college for checking the body temperature of student on Thermameter and Oxygen level on Oxymeter. And those students were found with high temperature or low oxygen level, they were sent to District General Hospital, Gadchiroli.

In this way, all the possible measures have been adopted to keep secure the college students from corona virus pandemic and made them understand the importance of health and hygiene.
